Cellular Pressure Sensor Monitor

LEVEL DEVIL by SensorTech

Reporting Options:

Daily intervals
At multiple defined set-points
High or low usage-rate detection
Load reporting

Model 7089

The model 7089 is the smallest hydrostatic, submersible, pressure sensor, with a cellular remote commu-nicator, on the market. Its five year battery, with an amp booster, required during cellular transmissions, makes it maintenance free and dependable. Field programmable scheduling and adjustable reporting is standard on this and all Level Devil® field devices. Different sensors and cable-materials are available to help serve a wide market of liquid level needs.

→ HOW TO USE: SELF-CONTAINED, ACTIVATED AND READY TO USE RIGHT OUT OF THE BOX. LOWER SENSOR TO BOTTOM OF TANK, COIN A TRANSMISSION TO CALIBRATE. LEVELS APPEAR ON THE WEB AND APPS PRESENTED IN INCHES, GALLONS, OR WHATEVER UNITS OF MEASURE YOUR DESIRE.

Reduced Expenses Eased Inventory Added Safety Prevent Run-Outs
